Manual of Steel Structures for Buildings

Content

PREFACE

CHAPTER 1 INTRODUCTION	1-1
1.1 Scope.....	1-1
1.2 Assumptions	1-1
1.3 Definitions	1-2
1.4 Notations.....	1-3
1.5 Conventions for member axis.....	1-3
CHAPTER 2 VERIFICATION OF SAFETY	2-1
2.1 Fundamental requirements.....	2-1
2.2 Definition and classifications	2-1
2.2.1 Limit States	2-1
2.2.2 Actions	2-1
2.2.3 Material properties	2-2
2.2.4 Other definitions.....	2-3
2.3 Design requirements	2-3
2.3.1 General requirement.....	2-3
2.3.2 Ultimate limit states.....	2-3
2.3.3 Serviceability limit states.....	2-4
2.3.4 Combination of actions	2-4
2.3.5 Durability	2-5
2.3.6 Fire resistance	2-5
CHAPTER 3 MATERIALS.....	3-1
3.1 General	3-1
3.2 Structural Steel	3-1
3.2.1 Nominal strength.....	3-1
3.2.2 Quality of steel	3-2
3.2.3 Dimensions, mass and tolerances.....	3-2
3.2.4 Material coefficients	3-2
3.2.5 Mechanical properties and chemical composition	3-3
3.2.6 Weldability.....	3-3
3.2.7 Steel other than the standard	3-3
3.3 Bolts, Nuts and Washers	3-3
3.4 Welding consumables	3-4

CHAPTER 4 SERVICEABILITY LIMIT STATE.....	4-1
4.1 Basis	4-1
4.2 Deflections	4-1
4.2.1 Vertical and horizontal deflections	4-1
4.2.2 Floor vibrations	4-1
4.2.3 Ponding	4-2
4.3 Worked Examples	4-3
4.3.1 Example 4.1	4-4
CHAPTER 5 ULTIMATE LIMIT STATE	5-1
5.1 Basis	5-1
5.2 Method of analysis.....	5-1
5.3 Design assumptions	5-2
5.4 Structural systems	5-3
5.4.1 Frame systems	5-3
5.4.2 Classification of frames.....	5-3
5.5 Frame imperfections.....	5-4
5.6 Frame stability	5-5
5.7 Classification of cross-sections	5-6
5.7.1 Classification.....	5-6
5.7.2 Effective cross-section properties of Class 4 cross-sections	5-6
CHAPTER 6 DESIGN OF TENSION MEMBERS	6-1
6.1 Introduction	6-1
6.2 Tension resistance of cross-section	6-1
6.3 Worked Examples	6-1
6.3.1 Example 6.1	6-3
CHAPTER 7 DESIGN OF COMPRESSION MEMBERS	7-1
7.1 Introduction	7-1
7.2 Compression resistance of cross-section.....	7-1
7.3 Buckling resistance of compression members	7-3
7.4 Woked Examples.....	7-3
7.4.1 Example 7.1	7-5
7.4.2 Example 7.2	7-7
CHAPTER 8 DESIGN OF BEAM MEMBERS.....	8-1
8.1 Introduction	8-1
8.2 Shear resistance of cross-section	8-3
8.3 Moment resistance of cross-section.....	8-3
8.3.1 Moment resistance with low shear ($V_{Sd} < 0,5 V_{pl,Rd}$).....	8-3
8.3.2 Moment resistance with high shear ($V_{Sd} > 0,5 V_{pl,Rd}$)	8-4
8.4 Lateral torsional buckling of beams	8-4

8.5	Shear buckling of beams	8-6
8.6	Flange induced buckling.....	8-7
8.7	Resistance of webs to Transverse forces	8-8
8.7.1	General	8-8
8.7.2	The crushing resistance.....	8-8
8.7.3	The crippling resistance.....	8-9
8.7.4	The buckling resistance	8-9
8.8	Worked Examples.....	8-10
8.8.1	Example 8.1	8-11
8.8.2	Example 8.2.....	8-15
8.8.3	Example 8.3.....	8-17
CHAPTER 9 DESIGN OF MEMBERS WITH COMBINED AXIAL FORCES AND BENDING MOMENTS		9-1
9.1	Introduction	9-1
9.2	Resistance of cross-sections with combined axial forces and bending moments ..	9-3
9.3	Buckling resistance of members with combined axial forces and bending moments.....	9-4
9.4	Worked Examples	9-5
9.4.1	Example 9.1	9-6
CHAPTER 10 DESIGN OF CONNECTIONS		10-1
10.1	Introduction	10-1
10.2	Design assumption	10-1
10.3	Bolted connections	10-2
10.3.1	Positioning of holes for bolts.....	10-2
10.3.2	Types of bolt connections	10-3
10.3.3	Distribution of forces	10-5
10.3.4	Design resistance of non-preloaded bolts	10-7
10.3.5	Design resistance of preloaded bolts	10-9
10.3.6	Design of block shear resistance.....	10-9
10.4	Welded connections	10-10
10.4.1	General	10-10
10.4.2	Types of welded connections	10-11
10.4.3	Distribution of forces	10-11
10.4.4	Design of fillet weld.....	10-13
10.4.5	Design of butt weld	10-14
10.4.6	Joints to unstiffened flanges	10-14
10.5	Worked Examples.....	10-15
10.5.1	Example 10.1.....	10-16
10.5.2	Example 10.2.....	10-18
10.5.3	Example 10.3.....	10-21

CHAPTER 11 QUALITY ASSURANCE PROCEDURES	11-1
11.1 Introduction	11-1
11.2 Documentation	11-1
11.2.1 Project specification	11-1
11.2.2 Quality plan	11-2
11.2.3 Safety plan	11-2
11.2.4 Execution documentation	11-2
11.3 Design technical specifications.....	11-3
11.4 Fabrication	11-4
11.4.1 Materials and fabricated products	11-4
11.4.2 Welding	11-4
11.4.3 Bolting	11-5
11.4.4 Protective treatment.....	11-6
11.5 Erection.....	11-7
11.6 Maintenance	11-8
CHAPTER 12 RESISTANCE OF MEMBERS UNDER FIRE ACTION	12-1
12.1 Introduction	12-1
12.2 Basic principles of structural fire design	12-1
12.3 Material properties at elevated temperature.....	12-2
12.4 Resistance of members under fire action	12-4
12.5 Critical temperature of the steel members	12-7
12.6 Steel temperature development of unprotected internal steelwork	12-8
12.7 Steel temperature development of internal steelwork insulated by fire protection material	12-10
12.8 Worked examples	12-11
12.8.1 Example 12.1	12-12
CHAPTER 13 DESIGN OF SHEAR CONNECTORS IN COMPOSITE BEAM	13-1
13.1 Introduction	13-1
13.1.1 Scope.....	13-1
13.1.2 Type of shear connectors	13-1
13.2 Basis of design	13-2
13.2.1 Design requirement	13-2
13.2.2 Method of analysis	13-2
13.2.3 Design assumptions	13-2
13.2.4 Deformation capacity of shear connectors	13-3
13.2.5 Spacing of shear connectors	13-3
13.3 Materials	13-4
13.3.1 Properties of steel and concrete in composite beam	13-4
13.3.2 Properties of shear connectors.....	13-5
13.4 Design longitudinal shear force	13-5

13.4.1	Full shear connection	13-5
13.4.2	Partial shear connectors	13-6
13.5	Design resistance of stud connectors.....	13-7
13.5.1	Solid slabs	13-7
13.5.2	Profiled steel sheeting	13-7
13.6	Worked examples.....	13-8
13.6.1	Example 13.1.....	13-9
APPENDIX A – MATERIAL PROPERTIES OF STRUCTURAL STEEL		A-1
A.1	General.....	A-1
APPENDIX B – PROPERTIES OF STRUCTURAL STEEL SECTIONS.....		B-1
B.1	General.....	B-1
B.2	Section classification.....	B-1
APPENDIX C – PROPERTIES OF COMMONLY USED WELDING CONSUMABLES		C-1
C.1	General	C-1
C.2	Classification and choice of electrodes.....	C-1
APPENDIX D – WELDING SYMBOLS.....		D-1
APPENDIX E – GUIDANCE ON ACCEPTANCE LEVELS OF WELDED JOINTS		E-1
APPENDIX F – REFERENCE STANDARDS		F-1
REFERENCES		R-1
